Soft Crowns

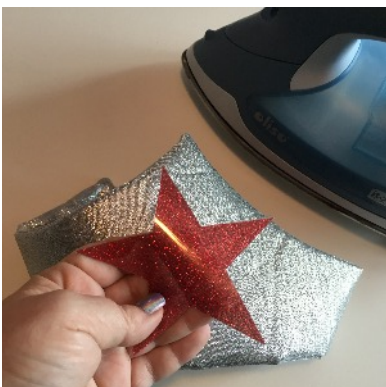

1. Cut 2 pcs of fabric and 1 pc of foam from template. Iron 1pc of fabric to fusible side of foam, right side facing out.

2. Layer fabrics right sides together and insert elastic on one end and pin to hold elastic in place. Elastic long end should be sandwiched between fabric pieces. Start seam on the non-elastic end and sew around entire crown with a ¼ inch seam. Clip points for bulk.

3. Flip crown right side out through open end of crown. Pull elastic to shape crown into a circle and insert other end of elastic as you fold the opening closed. Top stitch to close open end, catching elastic. Topstitch on crown as needed.

4. Decorate crown with Power Shine Foil or Glitter details!
