

202-3

Ellie Joos shares an eco-friendly and baby friendly diaper idea.

To make the diaper you will need the following:

- 1 – Babyville Boutique diaper cut
- 1 pkg. of Babyville Boutique FOE
- 1 pkg. of Babyville Boutique EZ Adjust Tape
- Mark B Gone pen
- Thread

Directions:

1. Fold Pul diaper fabric in half lengthwise. Place straight edge of pattern on fabric fold. Pin, and cut out fabric.

-
2. Trim off elastic casing flap and transfer elastic stitch markings and EZ Adjust tape markings to fabric with marking pen.
 3. Stitch loop tape to diaper front on right side.
 4. Stitch hook and loop tape to diaper wings on wrong side of fabric.
 5. Beginning at back edge 1" from marking on left of fabric with right side up, encase edge of fabric in FOE. Stitch using a zig-zag stitch. At marking, stretch FOE as you stitch to the next marking. Release stretch and continue stitching to leg marking.
 6. Fully stretch FOE across leg opening to next marking. Release stretch, continue stitching to next leg opening and stretch and stitch again.
 7. Release stretching and finish stitching FOE around wing and to the beginning of the FOE, stitching layers together.
